

RLK

MTC06 SERIES

REGULAR
MODEL

UNIVERSAL INTELLIGENT CUTTING MACHINE FOR SHEET AND COIL

ADVERTISING INDUSTRY DIGITAL INTELLIGENT CUTTING INTEGRATED SOLUTION

Air pump built-in, space saving

Energy-saving pioneer,
low-power air pump
shows extraordinary
adsorption power

5G+ smart Cut operating system 4.0

One-click layout,
automatic generation
and scanning code
cutting technology to
achieve rapid delivery
of finished products

Automatic tool setting system

no manual debugging,
intelligent control of the
depth of the tool, to
ensure high-precision
production

Equipped with automatic lubrication system

Reduce wear and
consumption to ensure
processing accuracy and
extend machine life

MTC06 REGULAR MODEL

Product Introduction

APPLICATION SCENARIO

corrugated board,plastic corrugated board,yellow cardboard,red cardboard,white cardboard,gray cardboard,PVC board ,foam board,EVA board,KT board,self-adhesive,gasket,etc.

Outdoor photo

Cultural wall

Shopping mall pillar

Reflective material

Bus sticker

TOOLS AS STANDARD

High speed oscillating tool

Foam Cut Tool

Universal cutting tool

Kiss-cut Tool

Pneumatic oscillating tool

Powerful driving rotary tool

Creasing Tool

Dotted line wheel tool

Milling Tool

Gray card grooving tool

Gray board V-CUT

TECHNICAL PARAMETERS

Machine model	MTC06-2516	MTC06-2513	MTC06-3020
Air Pump Power	7.5KW	7.5KW	9KW
Total power	9.5KW	9.5KW	11KW
Effective cutting size	2500*1300mm	2500*1600mm	3000*2000mm
Overall size of machine	3900*2285*1350mm	3900*2585*1350mm	4400*2985*1350mm
Cutting speed	300-1800mm (Depending on the material)		
Cutting thickness	≤50MM (Depending on the material)		
Transmission system	High-end servo motor drive,imported linear guides,bearings		
Working Voltage/Power	AC380V/220V±10%50HZ		
File System	Compatible with HPGL/PLT/DXF etc.Repeat accuracy ≤ 0.01mm Software resolution 0.025		
Working Characteristics	Can be connected to any CAD software,computer-aided design and cutting,can arried out at the same time		
Transfer port	Standard network port		
Fixed mode	Vacuum adsorption (with reverse blow)		
Operator interface	Touch Screen		
Feeding system	Imported crawler automatic feeding system (can be cut in unlimited length)		
Standard Tools	High-speed oscillating tool,universal cutting tool,kiss-cut tool,CCD automatic positioning		
Optional tools	Milling Tool,Great driving rotary tool,V-CUT,Foam Cut Tool,Creasing wheel tool,Pen,etc		

*We reserve the right of final interpretation of the above parameters, subject to change without prior notice
